INTRODUCTION TO A NEW WEB APPLICATION

PRESENTATION OF THE NEW FEATURES

Lonati DRM

EASY

FAST

DYNAMIC

Lonati DRM

EASY

Intuitive application that guides the user while browsing.

FAST

Quick display of the requested material with few information.

DYNAMIC

Filtered contents according to the user requests.

Lonati DRM
HIERARCHY

In the new system all data are subdivided according to the hierarchy:

BRAND NAME / PRODUCT / MODEL / ELECTRONICS.
(I.E. LONATI/MEN SINGLE CYLINDER / GK SERIES/ GK615S/SK2014).

Guided by the drop-down menu the user will have to select the desired model / electronics. The system, in dynamic mode, will display all the material related to this machine in one single box (Software Eprom, Driver Graphitron, Documentation).

COMMUNICATION

In the existing Lonati system we often find it difficult to identify which software should be used for a given machine because the names do not always match, i.e. we have a commercial name for the machine, a name for the graphitron driver and a name for the Eprom software.

ES: MAGL616F COMMERCIAL NAME.
    G616 GRAPHITRON DRIVER NAME.
    GL616CTE EPROM SOFTWARE NAME.

In the LonatiDRM a relation between these three elements has now been created so that the user can have all the information necessary to find the desired material.

COMMERCIAL NAME MAGL616F

MACHINE

DRIVER GRAPHITRON G616

SOFTWARE EPROM GL616CTE

Lonati DRM

CORRELATIONS

In the new system all the data are linked to each other to each release are linked all the release related to it.
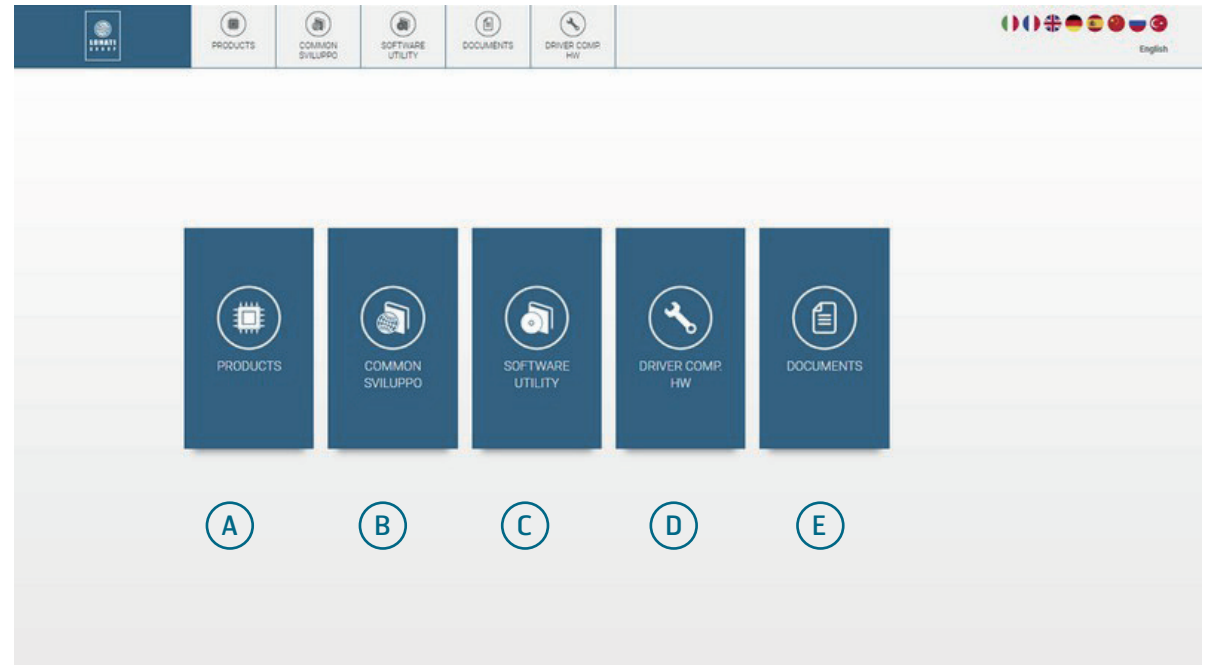

Example: if a specific version of Eprom Software is selected while browsing, the system will present a link for all the matchable versions of the Driver Graphitron as well as any related documentation or other related software.
